

Course Summary: May 24, 2025

Mathematics BSc Honours

- UCAS code: G100
- Full time
- 3 years

Build a strong foundation in modern mathematics with our accredited Mathematics BSc.

You are currently viewing course information for entry year: 2025

Next start date:

• September 2025

Tuition fees (Year 1)

- Home: **£9,535**
- International: £25600

Entry requirements and offers

- A-Level: AAB
- IB: 34 points

UCAS Institution name and code:

• NEWC / N21

Course overview

Develop your logical, strategic and analytical skills with our accredited Mathematics BSc degree.

All our mathematics and statistics degrees focus on three core areas:

- pure mathematics
- applied mathematics
- statistics

You'll have the flexibility to choose the area you'd like to focus on, or even transfer between our mathematics and statistics degrees.

You can also choose optional modules linked to our research areas. Our staff are experts in their field. They'll guide you through the latest developments in the discipline, such as:

- advanced hydrodynamics
- quantum mechanics
- Bayesian inference

BSc or MMath?

Our Mathematics degrees are offered at two levels:

• three-year Bachelor of Science (BSc)

• four-year Master of Mathematics (MMath)

Our four-year MMath degrees are more in-depth and include:

- advanced topics and a wider choice of modules
- specialist study, tailored to your own interests, that develops your skills in research and communication
- more technical skills, for those who want to increase their employability or continue on to postgraduate study

Your course and study experience - disclaimers and terms and conditions

Please rest assured we make all reasonable efforts to provide you with the programmes, services and facilities described. However, it may be necessary to make changes due to significant disruption, for example in response to Covid-19.

View our Academic experience page, which gives information about your Newcastle University study experience for the academic year 2024-25.

See our terms and conditions and student complaints information, which gives details of circumstances that may lead to changes to programmes, modules or University services.

Additional information

You'll study a common set of core modules for the first two years on these degrees:

- Mathematics BSc
- Mathematics MMath
- Mathematics and Statistics BSc

This means you'll have the flexibility to transfer between these degrees until the end of your second year. To qualify for Stages 3 and 4 of the MMath degree, you should have an upper-second-class average mark in Stages 2 and 3.

Quality and ranking

Professional accreditation and recognition

All professional accreditations are reviewed regularly by their professional body.

Modules and learning

Modules

The information below is intended to provide an example of what you will study.

Most degrees are divided into stages. Each stage lasts for one academic year, and you'll complete modules totalling 120 credits by the end of each stage.

Our teaching is informed by research. Course content may change periodically to reflect developments in the discipline, the requirements of external bodies and partners, and student feedback.

Optional module availability

Student demand for optional modules may affect availability.

Full details of the modules on offer will be published through the Programme Regulations and Specifications ahead of each academic year. This usually happens in May.

To find out more please see our terms and conditions

.....

You'll take a set of core modules that are common across our mathematics and statistics degrees. Learn about the key skills and knowledge that all

mathematicians and statisticians need. We'll also cover the main areas of pure mathematics, applied mathematics, algebra, probability and statistics.

Modules

Compulsory Modules	Credits
Introductory Algebra	20
Real Analysis	10
Introduction to Probability and Statistics	20
Logic, Sets and Counting	10
Number Systems	10
Problem Solving with Python	10
Introductory Calculus and Differential Equations	20
Multivariable Calculus	10
Dynamics	10

You'll continue to study a set of core modules that are common across our mathematics and statistics degrees. You'll learn about more advanced techniques and build on what you've learnt in Stage 1.

Modules

Compulsory Modules	Credits
Linear Algebra	10
Complex Analysis	10
Groups and Rings	10
Statistical Inference	10
Probability	10
Regression	10
Vector Calculus	10

Differential Equations, Transforms and	10
Waves	10
Fluid Dynamics I	10

In your final year, you can choose from a wide range of optional modules. These are closely linked to the research expertise of our staff.

You'll also work on a group project in applied mathematics, pure mathematics, statistics or education.

Modules

Compulsory Modules	Credits
Mathematical & Skills Group Project	20
Optional Modules	Credits
Clinical Trials	10
Decision Modelling for Health Data Science	10
Topics in Medical Statistics and Health Data Science	10
Curves and Surfaces	10
Coding Theory	10
Global Education in Mathematics and Statistics	10
Group Theory	10
Linear Analysis	10
Matrix Analysis	10
Metric Spaces and Topology	10
Number Theory and Cryptography	20
Measure Theory	10
Stochastic Financial Modelling	10

Experimental Design	10
Foundations of Machine Learning	10
Extreme Value Theory	10
Time Series	10
Survival Analysis	10
Statistical Genetics	10
Mathematical Statistics	10
Statistical Modelling	10
Bayesian Statistics and Decision Theory	10
Principles of Quantum Mechanics	10
Mathematical Biology	10
Quantum Information	10
Methods for Differential Equations	10
Fluid Dynamics II	10
Relativity and Fundamental Particles	10
Hydrodynamic and Climate Instabilities	10
Variational Methods and Lagrangian Dynamics	10
Career Development for final year students	20
Classical Fields	10

Information about these graphs

We base these figures and graphs on the most up-to-date information available to us. They are based on the modules chosen by our students in 2024-25.

Teaching time is made up of:

• scheduled learning and teaching activities. These are timetabled activities with a member of staff present.

• structured guided learning. These are activities developed by staff to support engagement with module learning. Students or groups of students undertake these activities without direct staff participation or supervision

Teaching and assessment

Teaching methods

You'll be taught through:

- lectures
- problem classes
- tutorials and drop-in sessions
- practical computer classes and computer-based assessments
- data collection and analysis

Assessment methods

You'll be assessed through a combination of:

- Assignments written or fieldwork
- Examinations practical or online

Skills and experience

Business skills

Throughout your degree, you'll develop a range of transferable skills, such as:

- analytical writing
- report writing
- presentation skills

You can also work on an optional industry project or take a work placement. These opportunities are very flexible. They're arranged throughout the academic year, during the summer period or with students taking a break from academic studies.

Projects with industry can prepare you for a career both outside and within academia, learning vital new skills and gaining new experiences.

Opportunities

Study abroad year

Experience life in another country by choosing to study abroad as part of your degree. You'll be encouraged to embrace fun and challenging experiences, make connections with new communities and graduate as a globally aware professional, ready for your future.

You can choose to spend up to a year studying at a partner institution overseas. Our overseas partner institutions include:

- Universiteit Leiden, Netherlands
- L-Universta ta' Malta, Malta
- Universitat Politècnica de Catalunya, Barcelona
- Technisches Universitat Munchen, Munich

There are also lots of options in North America, Australia and Asia, including:

- Buffalo, New York State
- McGill, Montreal
- University of New South Wales, Sydney
- Hong Kong
- Singapore

During your time studying abroad, you will select from a range of modules offered by your host university. Alongside taking some subject-relevant modules, you will be given greater flexibility to choose modules from different disciplines (eg Languages, Business)

If you choose to study abroad, it will extend your degree by a year.

Find out more about study abroad

Short-term global opportunities

During your degree, you can take part in short-term global opportunities in countries such as:

- USA
- Cyprus
- Hong Kong
- Singapore
- Sri Lanka

The activities range from four days to eight+ weeks, and include:

- summer schools
- internships
- volunteering
- experiential learning

Funding is available to support students who want to participate.

Work placement

Apply your practical skills, increase your confidence and gain real-life work experience to accelerate your career. Take a 9-12-month industrial placement in the UK or abroad. Work placements usually take place in stage 3 of your studies and extend your degree by one year.

Find out more about work placements.

Facilities and environment

Facilities

You'll join the School of Mathematics, Statistics and Physics based in the Herschel Building.

A state-of-the-art learning environment will support your studies and you'll have access to extensive IT facilities for teaching and self-study, including:

- computer-based exercises with instant review of model solutions
- problem-solving video tutorials
- recording system for video capture of lectures, which you can download and watch again to help with your revision

The Herschel Building also has dedicated study and social spaces, and a computing area.

Support

We take your health and wellbeing seriously and are committed to supporting you throughout your studies so you can fulfil your potential at university. This support includes:

• a personal tutor who is an academic member of staff who can help you with academic and personal issues throughout your degree

- a peer mentor scheme which pairs you with a current student from your course to help you navigate your first year at university
- a student-staff committee, to give you an opportunity to have a say in how your degree works
- Student Wellbeing Advisors who can offer comprehensive listening and support and signpost you to other University support services or external support agencies

Transition Officer

A dedicated staff member is here to support you in transitioning from school to university study.

The Transition Officer works with Stage 1 undergraduates to provide:

- Stage 1 pastoral and academic support
- attendance and academic performance monitoring
- Stage 1 induction
- weekly drop-ins

You'll also benefit from our:

- induction programme, including social events, to help you settle in quickly
- activities and events run by our student-run society, MathSoc
- homework classes to help with assignments

Your future

Join a network of successful graduates

Recent graduates have secured roles such as:

- business intelligence consultant
- data scientist
- sports analyst
- insights manager
- audit associate
- finance analyst

Companies our graduates have gone on to work for:

- Deloitte
- Department of Workplace and Pensions
- BAE Systems
- Barclays
- Butternut Box
- EY

• Scott Logic

Careers for mathematicians and statisticians

Mathematicians and statisticians have always been highly valued by employers for their analytical and problem-solving skills, and their ability to think logically and quantitatively.

These skills are in increasing demand beyond the traditional sectors of finance, with industries such as technology, healthcare, artificial intelligence, cybersecurity, data science, and engineering actively seeking mathematical expertise to drive innovation and decision-making.

Businesses have ever increasing volumes of data available and this data needs to be analysed and modelled. Our recent graduates are putting their mathematical skills into practice in sectors such as:

- utilities
- defence
- advanced manufacturing
- transportation
- energy
- sports analytics
- health economics

Maths graduates are also highly sought-after for roles in teaching.

You'll also develop key skills which are essential for the employment market such as communication, teamwork, planning, and organisation.

Benefit from strong industry links

You'll also benefit from our well-established links. Our industrial advisory board members and research colleagues influence and inform our curriculum and include representatives from businesses such as:

- Advanced Engineering Solutions
- Atkins Realis

- Azets
- Arup
- Big Spark
- Centre for Process Innovation
- Department for Environment, Food & Rural Affairs (DEFRA)
- Draeger
- National Audit Office
- National Nuclear Laboratory
- Nissan
- North Star Ventures
- Northern Gas Networks
- Northumbria Healthcare
- Roche
- Rosen Group
- Royal Meteorological Society
- Sage plc
- York & North Yorkshire Office for Policing, Fire, Crime and Commissioning

Make a difference

Follow in their footsteps

- Name: Emma
- Graduated: 2016
- Now working as: Hiscox Insurance

"It is great to be able to take the skills and knowledge I learnt at university and apply it to real-world applications."

We asked Emma to take a look back at her time at Newcastle and tell us how it has impacted her career as a catastrophe modeller.

Find out about Emma's journey

Careers support

Our Careers Service is one of the largest and best in the country, and we have strong links with employers. We provide an extensive range of opportunities to all students through our ncl+ initiative.

Visit our Careers Service website

Recognition of professional qualifications outside of the UK

From 1 January 2021 there is an update to the way professional qualifications are recognised by countries outside of the UK

Check the government's website for more information.
