

Course Summary: March 27, 2026

Mathematics and Statistics BSc Honours

- UCAS code: **GG13**
- Full time
- 3 years

Our accredited three-year degree helps equip you with the skills you need to make an impact in a rapidly evolving world.

You are currently viewing course information for entry year: **2026**

Next start date:

- September 2026

Tuition fees (Year 1)

- Home: **£9,790**
- International: **£26,400**

Entry requirements and offers

- A-Level: **AAB**
- IB: **34 points**

UCAS Institution name and code:

- NEWC / N21

Undergraduate Open Day

Start your university journey. Find where you belong. Friday, June 26 (9:00-16:00)
Saturday, June 27 (9:00-16:00)

Course overview

The ability to analyse complex data and make informed decisions is in high demand across a wide range of industries.

On our Mathematics and Statistics BSc, you'll explore statistical approaches and techniques so you can advance innovation and solve real-world problems.

You'll combine core mathematics with an in-depth focus on:

- probability
- data analysis
- statistical modelling

You'll graduate with confidence to interpret data, make predictions and assess risks.

Study the fundamental principles of mathematics and statistics. You'll learn to analyse data, solve problems, and make informed decisions in various fields.

All our mathematics and statistics degrees focus on three core areas:

- pure mathematics
- applied mathematics
- statistics

You'll have the flexibility to choose the area you'd like to focus on, or even transfer between our mathematics and statistics degrees.

You can also choose optional modules linked to our research areas. Our staff are experts in their field. They'll guide you through the latest developments in the discipline, such as:

- advanced hydrodynamics
- quantum mechanics
- Bayesian inference

Your course and study experience - disclaimers and terms and conditions

Please rest assured we make all reasonable efforts to provide you with the programmes, services and facilities described. However, it may be necessary to make changes due to significant disruption, for example in response to Covid-19.

View our [Academic experience page](#), which gives information about your Newcastle University study experience for the academic year 2025-26.

See our [terms and conditions and student complaints information](#), which gives details of circumstances that may lead to changes to programmes, modules or University services.

Additional information

Flexible degree structure

You'll study a common set of core modules for the first two years on these degrees:

- Mathematics BSc
- Mathematics MMath
- Mathematics and Statistics BSc

This means you'll have the flexibility to transfer between these degrees until the end of your second year. To qualify for Stages 3 and 4 of the MMath degree, you should have an upper-second-class average mark in Stages 2 and 3.

Quality and ranking

Professional accreditation and recognition

All professional accreditations are reviewed regularly by their professional body.

Modules and learning

Modules

The information below is intended to provide an example of what you will study.

Most degrees are divided into stages. Each stage lasts for one academic year, and you'll complete modules totalling 120 credits by the end of each stage.

Our teaching is informed by research. Course content may change periodically to reflect developments in the discipline, the requirements of external bodies and partners, and student feedback.

Optional module availability

Student demand for optional modules may affect availability.

Full details of the modules on offer will be published through the [Programme Regulations and Specifications](#) ahead of each academic year. This usually happens in May.

To find out more please [see our terms and conditions](#)

You'll take a set of core modules that are common across our mathematics and statistics degrees. Learn about the key skills and knowledge that all mathematicians and statisticians need. We'll also cover the main areas of pure mathematics, applied mathematics, algebra, probability and statistics.

Modules

Compulsory Modules	Credits
Introductory Algebra	20
Real Analysis	10
Introduction to Probability and Statistics	20
Logic, Sets and Counting	10
Number Systems	10
Problem Solving with Python	10
Introductory Calculus and Differential Equations	20
Multivariable Calculus	10
Dynamics	10

You'll study a core set of modules in pure mathematics, applied mathematics, and statistics. You'll have some flexibility in your module choices. You'll learn advanced techniques and build upon what you learned in Stage 1.

Modules

Compulsory Modules	Credits
Linear Algebra	10
Complex Analysis	10
Groups and Rings	10
Statistical Inference	10
Stochastic Processes	10
Data Visualisation	10
Probability	10
Regression	10
Vector Calculus	10
Differential Equations, Transforms and Waves	10
Fluid Dynamics I	10

In your final year, you can choose from a wide range of optional modules. These are closely linked to the research expertise of our staff.

You'll also work on a group project in applied mathematics, pure mathematics, statistics or education.

Modules

Compulsory Modules	Credits
Mathematical & Skills Group Project	20
Optional Modules	Credits
Clinical Trials	10
Decision Modelling for Health Data Science	10
Topics in Medical Statistics and Health Data Science	10
Curves and Surfaces	10

Coding Theory	10
Global Education in Mathematics and Statistics	10
Group Theory	10
Linear Analysis	10
Matrix Analysis	10
Metric Spaces and Topology	10
Number Theory and Cryptography	20
Measure Theory	10
Stochastic Financial Modelling	10
Experimental Design	10
Foundations of Machine Learning	10
Extreme Value Theory	10
Time Series	10
Survival Analysis	10
Statistical Genetics	10
Mathematical Statistics	10
Statistical Modelling	10
Bayesian Statistics and Decision Theory	10
Principles of Quantum Mechanics	10
Mathematical Biology	10
Quantum Information	10
Methods for Differential Equations	10
Fluid Dynamics II	10
Relativity and Fundamental Particles	10
Hydrodynamic and Climate Instabilities	10
Variational Methods and Lagrangian Dynamics	10

Career Development for final year students	20
Classical Fields	10

Teaching and assessment

Teaching methods

You'll be taught through:

- lectures
- problem classes
- tutorials and drop-in sessions
- practical computer classes and computer-based assessments
- data analysis

Assessment methods

You'll be assessed through a combination of:

- Assignments – written or fieldwork
- Examinations – practical or online
- Group work
- Presentations
- Reports

Skills and experience

Practical skills

Gain hands-on experience in our computer teaching lab and develop essential computational skills. In Stage 1, you'll be introduced to Python and R, with further advancement in Stage 2.

Learn programming languages and tackle a wide range of mathematical and statistical problems.

Business skills

Throughout your degree, you'll develop a range of transferable skills, such as:

- analytical writing
- report writing
- presentation skills
- analysing data trends
- manipulating big data
- coding

You can also work on an optional industry project or take a work placement. These opportunities are very flexible. They're arranged throughout the academic year, during the summer period or with students taking a break from academic studies.

Join the Data Innovation Bootcamp, hosted by the National Innovation Centre for Data. Network with businesses and apply data science methodologies to solve a real business challenge.

Research skills

This course is delivered by the School of Mathematics, Statistics and Physics.

Our teaching staff are experts in their field. You'll be taught by academics from the Statistics research group, who deliver world-class research in modern statistics and data science.

Newcastle University is also home to the UK's National Innovation Centre for Data (NICD). NICD has extensive links with industrial partners across a range of sectors.

Student stories

I absolutely loved Multivariable Calculus and Differential Equations, the lecturer took the already interesting subject to a whole new level.

Opportunities

Study abroad year

Experience life in another country by choosing to study abroad as part of your degree. You'll be encouraged to embrace fun and challenging experiences, make connections with new communities and graduate as a globally aware professional, ready for your future.

You can choose to spend up to a year studying at a partner institution overseas. Our overseas partner institutions include:

- Universiteit Leiden, Leiden, Netherlands
- Technische Universität München, Munich, Germany
- Institut National Des Sciences Appliquées De Rennes, Rennes, France
- Lappeenranta University of Technology, Lappeenranta, Finland
- Humboldt-Universität zu Berlin, Berlin, Germany

There are also lots of options in North America, Australia and Asia, including:

- State University of New York (SUNY) Buffalo, Buffalo, USA
- University of New South Wales, Sydney, Australia
- Hong Kong University of Science and Technology, Clear Water Bay, Hong Kong
- National University of Singapore, Singapore
- University of Florida, Florida, USA
- San Jose State University, California, USA
- Korea University, Seoul, South Korea
- National Taiwan Normal University, Taipei, Taiwan

During your time studying abroad, you will select from a range of modules offered by your host university. Alongside taking some subject-relevant modules, you will be given greater flexibility to choose modules from different disciplines (eg Languages, Business)

If you choose to study abroad, it will extend your degree by a year.

[Find out more about study abroad](#)

Short-term global opportunities

During your degree, you can take part in short-term global opportunities in locations such as:

- USA
- Cyprus
- Hong Kong
- Singapore
- Sri Lanka

The activities range from four days to eight+ weeks, and include:

- summer schools
- internships
- volunteering
- experiential learning

Funding is available to support students who want to participate.

Work placement

Apply your practical skills, increase your confidence and gain real-life work experience to accelerate your career. Take a 9-12-month industrial placement in the UK or abroad. Work placements usually take place in stage 3 of your studies and extend your degree by one year.

[Find out more about work placements.](#)

Facilities and environment

Facilities

You'll join the [School of Mathematics, Statistics and Physics](#) based in the Herschel Building.

A state-of-the-art learning environment will support your studies and you'll have access to extensive IT facilities for teaching and self-study, including:

- computer-based exercises with instant review of model solutions
- problem-solving video tutorials

- recording system for video capture of lectures, which you can download and watch again to help with your revision

The Herschel Building also has dedicated study and social spaces, and a computing area.

Support

We take your health and wellbeing seriously and are committed to supporting you throughout your studies so you can fulfil your potential at university. This support includes:

- a personal tutor who is an academic member of staff who can help you with academic and personal issues throughout your degree
- a peer mentor scheme which pairs you with a current student from your course to help you navigate your first year at university
- a student-staff committee, to give you an opportunity to have a say in how your degree works
- Student Wellbeing Advisors who can offer comprehensive listening and support and signpost you to other University support services or external support agencies

Transition Officer

A dedicated staff member is here to support you in transitioning from school to university study.

The Transition Officer works with Stage 1 undergraduates to provide:

- Stage 1 pastoral and academic support
- attendance and academic performance monitoring
- Stage 1 induction
- weekly drop-ins

You'll also benefit from our:

- induction programme, including social events, to help you settle in quickly

- activities and events run by our student-run society, [MathSoc](#)
- homework classes to help with assignments

Your future

Join a network of successful graduates

This Mathematics BSc can provide a route into various careers across a broad range of industries. Previous graduates have gone into these roles within 15 months of graduating:

- Statistical Officer at Department for Work and Pensions
- Auditor at EY
- Business Analyst at HSBC
- Corporate Tax Analyst at Deloitte
- Pricing Analyst at Admiral
- Maths Teacher at King James Academy
- Transport Planner at Vectos Microsim
- Data Analyst at Jet2Holidays
- Performance Data Analyst at AkzoNobel
- Graduate Systems Engineer at Principle One Ltd

Further study

This degree provides a pathway to Master's and PhD-level study in a variety of fields. This depends on the optional modules you choose.

As a Mathematics and Statistics graduate, you can pursue advanced research in:

- statistical modeling and data analysis
- machine learning and artificial intelligence
- mathematical finance and risk management
- biostatistics and epidemiology
- computational statistics and big data
- cryptography and information security
- applied mathematics in engineering and physics
- actuarial science and insurance mathematics
- environmental and ecological modeling

Careers for mathematicians and statisticians

Mathematicians and statisticians have always been highly valued by employers for their analytical and problem-solving skills, and their ability to think logically and quantitatively.

These skills are in increasing demand beyond the traditional sectors of finance, with industries such as technology, healthcare, artificial intelligence, cybersecurity, data science, and engineering actively seeking mathematical expertise to drive innovation and decision-making.

Businesses have ever increasing volumes of data available and this data needs to be analysed and modelled. Our recent graduates are putting their mathematical skills into practice in sectors such as:

- utilities
- defence
- advanced manufacturing
- transportation
- energy

- sports analytics
- health economics

Maths graduates are also highly sought-after for roles in teaching.

You'll also develop key skills which are essential for the employment market such as communication, teamwork, planning, and organisation.

Benefit from strong industry links

You'll also benefit from our well-established links. Our industrial advisory board members and research colleagues influence and inform our curriculum and include representatives from businesses such as:

- Advanced Engineering Solutions
- Atkins Realis
- Azets
- Arup
- Big Spark
- Centre for Process Innovation
- Department for Environment, Food & Rural Affairs (DEFRA)
- Draeger
- National Audit Office
- National Nuclear Laboratory
- Nissan
- North Star Ventures
- Northern Gas Networks
- Northumbria Healthcare
- Roche
- Rosen Group
- Royal Meteorological Society
- Sage plc
- York & North Yorkshire Office for Policing, Fire, Crime and Commissioning

Make a difference

Follow in their footsteps

- Name: Emma
- Graduated: 2016
- Now working as: Hiscox Insurance

"It is great to be able to take the skills and knowledge I learnt at university and apply it to real-world applications."

We asked Emma to take a look back at her time at Newcastle and tell us how it has impacted her career as a catastrophe modeller.

[Find out about Emma's journey](#)

Careers support

The School of Mathematics, Statistics and Physics is supported by Careers Service and the Learning Partnerships team to support your career readiness from the moment you arrive.

You'll benefit from:

- guest lectures from alumni and industry built into the modules
- career-planning sessions from award-winning Careers service team
- employers regularly visiting campus and the School

There is also a Maths, Stats and Physics Employability resource which brings you the latest opportunities, adverts and news.

There is also the popular optional Stage 3 module in Career Development if you wish to further enhance your employability.

Our Careers Service is one of the largest and best in the country, and we have strong links with employers. We provide an extensive range of opportunities to

all students through our ncl+ initiative.

[Visit our Careers Service website](#)

Recognition of professional qualifications outside of the UK

If you're studying an **accredited degree** and thinking about working in Europe after you graduate, the best place to find current information is the [UK Government's guidance on recognition of UK professional qualifications in EU member states](#). This official resource explains whether your profession is regulated in another country, what steps you need to take, and which organisation you should contact.
